Members of the Board,

I am tendering my resignation from Kingfisher Public Schools. The past six months have shown a deterioration in the relationship between the Superintendent and the Board of Education. This isn't healthy, and I believe my further occupancy of the position of Superintendent is a distraction from the education of the students attending Kingfisher Public Schools.

The students deserve the opportunity to receive the best education that can possibly be provided to them. The faculty and staff deserve a positive environment to provide this education. Disagreements and mistrust between upper leadership and a consensus of the Board of Education do not provide this environment. It is appropriate that I step away.

Cordially,
